CRITICAL INCIDENT POLICY

Introduction

WHAT IS A CRITICAL INCIDENT?

A critical Incident may be defined as follows:

‘A tragic or traumatic event or situation affecting a student or staff member which has the potential to cause unusually strong emotional reactions in the campus community.’

Examples of Critical Incidents in the International Student arena would include, but are not limited to:

- **Death** (including death of a dependant residing in Australia)
  - Accidental
  - Suicide
  - Result of an injury or terminal illness
  - Murder
- **Serious Illness** which causes the deterioration of the student/staff member’s health over time.
- **Serious Injury** which prevents or severely affects the student’s ability to continue with or complete the course.

Serious illness or injury would probably not be considered a critical incident in the broader campus community.

However, considering the relatively ‘close knit’ nature of most international student communities, and their physical isolation from the familiar support networks they grew up with, critical incidents of this nature can have a wide reaching, sometimes devastating and usually long lasting effect on a student’s ability to cope with their studies.
